

WOOD

it makes a house a home

- Wood is comfortable, and naturally enhance's the interior atmosphere and living space
- Wood windows and doors increase your building's value and street appeal
- Wood has an estimated service life of at least 2x that of pvc
- Wood is low maintenance, long lasting, and repairable
- Aluminum-clad wood has a maintenance-free exterior
- Wood windows and doors can be built much larger than other window types, and are easy to customize
- Wood can be stained or painted to any color
- Wood is naturally insulating, no thermal bridging
- Wood is healthy, sustainable, and doesn't off-gas
- Wood has the lowest environmental impact of any window material, and continues to save energy and CO2 during its lifetime

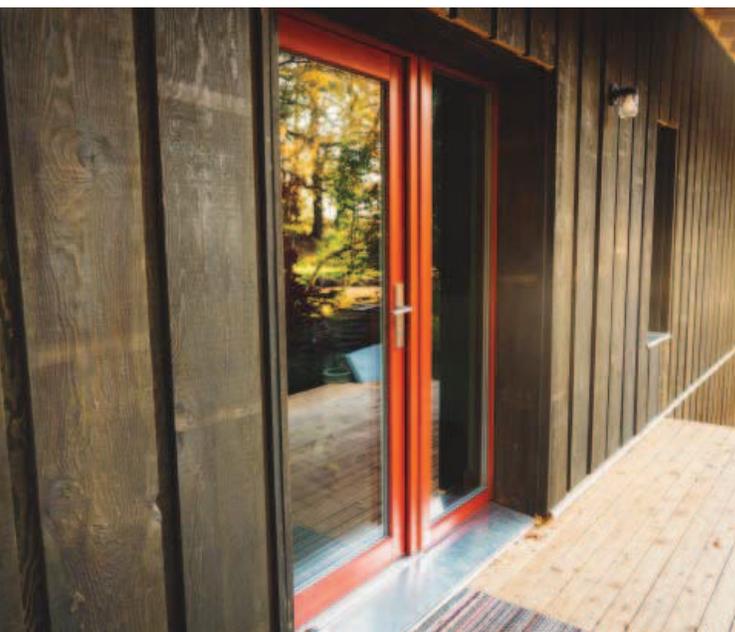

WOOD

it makes a house a home

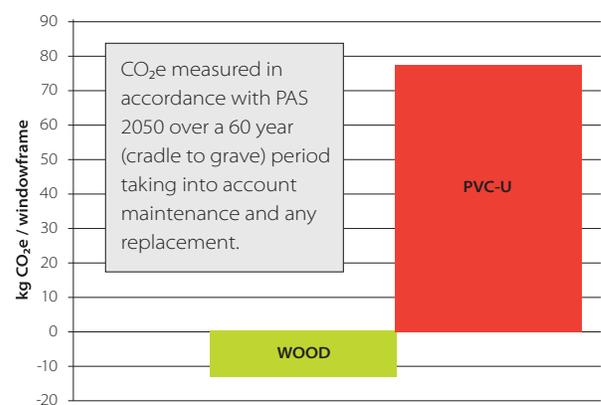

Feel the difference

Wood windows and doors are an investment you will never regret!

Carbon dioxide emissions (CO₂e) per window frame material over a 60 year life
